with our imported
Icelandic pumice

WE MAKE FIRE... BETTER.

Custom Luxury Fireplaces

Extracted from Iceland's Mt. Hekla volcano, Isokern brand products have been made from the cleanest, purest pumice for over 80 years. Our lightweight, insulating, masonry components cradle the raw power of fire in the safest, most energy-efficient material on earth. Totally customizable, Isokern allows architects and their clients to pursue their most inspired designs, while connecting with the natural beauty of fire.

Did You Know?

Our pumice ships directly from the Mount Hekla Volcano in Iceland to our state-of-the-art automated manufacturing facility in Chesapeake, Virginia.

Iceland

Chesapeake, VA

Earthcore’s Ecosophy 

Since 1989, Earthcore continues to create and deliver earth-friendly products utilizing volcanic stone from Iceland’s Mt. Hekla. Our clean, pure pumice is free of volatile organic (inert) components and dates back to over 6000 years, which is relatively young compared to other volcanic materials extracted around the globe. This exclusive pumice is lightweight and refractive (meaning fire-resistant), making all our products highly insulating and affordable.

Our pumice is mined from vast lava fields and then transported to our factory in Virginia, where the Isokern brand fireplaces and chimneys are manufactured using an over 80-year-old Danish technology. Not only do Isokern fireplaces exceed EPA standards for wood and gas fuel burning, our Green Tech solution helps reduce greenhouse emissions by an astonishing 80%.

We are proud to be the leader in green fireplaces and a carbon-free company.

Our Mission

For over thirty years and during these rapidly changing times, we at Earthcore pride our success on the use of material derived directly from Mother Nature, Isokern's Icelandic volcanic pumice stone. We continue to recognize our responsibility to protect the planet, minimize our impact on the environment, and improve global sustainability in every component we manufacture.

As a result, we assure all our customers that they are contributing to a carbon-neutral environment through the purchase and installation of all Isokern products.

Our novel innovations and advanced technologies assist in lowering our carbon footprint, from the electricity used in our state-of-the-art manufacturing process to our new innovation production laboratory.

So, take a moment to read through our 2021 catalogue and please keep in mind that every Isokern you purchase, you are directly contributing to a cleaner planet since we are recycling a product from Mother Nature.

Your safety and a clean global environment are our main priorities, which is why at Earthcore, "We make fire...better."

Carl R. Spadaro
Founder & CEO of Earthcore

**A Name Built on
Reliability for over**

30
Years

Since 1989, we have proudly provided exceptional products combined with unmatched customer service from our 9 solution centers and dedicated network of over 500 dealers.

INNOVATION

In 2019, we completed our new innovation production laboratory to begin manufacturing our patented modulated gas fuel delivery system. After many years of research, we now have the ability to produce cost-effective opportunities in decorative gas fire features that go well beyond what markets offer today. All of our new offerings are made using high quality stainless steel that appeal to consumers who demand products that last a lifetime. This lab enables us to create more synergy between our pumice products and new inventions.

**“Talent is a flame.
Genius is a fire.”**

– Bernard Williams

Modular Gas Delivery Systems

The first product born out of our innovation facility is our patented modulated gas fuel delivery system with quick connect technology. Offered under our Isoflames brand, we are able to build the longest linear UL listed burners on the market.

ISO KERN

ALL FUEL

Offers wood or gas
burning solutions

STANDARD

Available Sizes: 36 • 42 • 46

As the first Isokern modular fireplace introduced in the United States, the modular construction of the Standard Series allows you to unleash your creative desires with a fireplace as unique as you are. Whether you choose wood burning, natural gas, or liquid propane, the Standard Series sets the standard. In an outdoor application, this fireplace can be finished with any veneer including brick, stone, stucco, or tile.

Applications

Indoor
Outdoor
Wood Burning
Natural Gas
LP (*Liquid Propane*)
Multi-Sided Availability

ISOKERN

ALL FUEL

Offers wood or gas
burning solutions

MAGNUM+

Available Sizes: 84 • 96 • 108 • 120

When you're designing a space that's larger than life, you need a fireplace to match it! **NEW** from Isokern is our ground-breaking Magnum+ Fireplace.

Boasting widths up to 10 feet and finished opening heights of 44", this stately fireplace is the largest UL listed fireplace on the market. Earthcore is always looking to expand the boundaries of fire, and with the Magnum+, fire has no boundaries.

Applications

Indoor
Outdoor
Wood Burning
Natural Gas
LP (*Liquid Propane*)
Eco-Steel Chimney
Custom Finish

Specifications - see page 47

MAXIMUS LINEAR

Available Sizes: 48 • 72 • 96 • 120

The Maximus Linear Series is contemporary sophistication with a sleek design that can be customized to fit any aesthetic. Choose an open or glass front firebox and finish it off with your choice of colored glass media or log set in driftwood finish. Isokern Linear Fireplace systems come with a Remote-Controlled Electronic Ignition System and Mechanical Exhaust Fan. The glass front unit does not use conditioned air from the room, complying with air quality control standards.

Applications

- Indoor
- Natural Gas
- LP (*Liquid Propane*)
- Custom Finish
- Combustible Floor Installation
- Zero Clearance to Open Front
- 12" B-Vent Chimney
- Electronic Ignition System
- Mechanical Exhaust Fan

Specifications - see page 49

Fireglass Options

Isoflames Linear Burner

Each Isokern Maximus Linear comes standard with the Isoflames Linear Burner System. This patented quick connect system is a modular burner system that is easily installed and comes in sizes from 24" up to 96". It can also be used in any fireplace to give a more modern look to the traditional fireplace.

Log Set Options

Coastal Oak

Engelmann Oak

Laurel Oak

ISOKERN

DIRECT VENT

Sealed glass front

MAXIMUS

TRADITIONAL

Available Sizes: 46 • 48

The Isokern MAXIMUS Series is the first ever masonry direct vent fireplace. It offers an expansive ceramic glass opening with Invisi-Barrier and Triple Stadium Burner for exceptional appearance and flame presentation. This glass front unit does not use conditioned air from the room, complying with air quality control standards. With an array of options, the MAXIMUS provides endless possibilities for making your space warm and inviting.

Applications

Indoor
Natural Gas
LP (*Liquid Propane*)
Direct Vent Chimney
Custom Finish
Combustible Floor Installation

Specifications - see page 47

BVETTO

Available Sizes: 36 • 46

Opening heights are sure to make a true statement in any living space with Isokern's Bvetto Series. As the first and only field assembled gas appliance fireplace, the Isokern Bvetto Series offers the largest available opening heights in the industry of 52". With our proprietary quick fire ignition system, the Isokern Bvetto requires our exclusive Isoflames Stadium Burner and Remote Electronic Ignition.

Charred Hickory

Summit Pine

DM54

Dual Module Chimney System

The DM54 Chimney System is a zero clearance system made with our Icelandic pumice, a natural insulator, separating our system from all other chimneys. The insulating properties of pumice allow the flue gases in the chimney to quickly reach their optimum temperature, enabling the heating appliance to perform efficiently. It also keeps the chimney warmer longer as the heat output of the fireplace decreases. This not only aids performance, but reduces the likelihood of condensation and soot build-up.

Our component based system is made up of inner and outer blocks that are installed with staggered joints for safety and stability. The double layer of pumice blocks, separated by an air gap, maximizes the chimney performance. This system is the only masonry chimney system tested and listed to UL 103HT (2100° High Temperature) standards.

Specifications - see page 49

Iso-Caps

Specifically designed by Earthcore for the Isokern DM54 flue liner, the Iso-Cap has minimal installation. Sealed with silicone caulk, each Iso-Cap simply slides into or over the inner flue liner of the DM54 chimney.

AVAILABLE WITH TOP SEAL DAMPER

Shown here is Offset Blocks

Shown here is a Brick Ledge

Isokern Chimney Systems have vented over 465 million feet of chimney in North America.

The dual module design allows for more diverse, lightweight, masonry-type installations. Each component is built with tongue and groove construction with offset joints, enabling a tighter fit for maximum safety and consistent installation.

In addition, the DM Chimney System, with 100% zero-clearance to combustibles, makes it the easiest flue system to install.

ECO STEEL

The lightweight Venting Solution uses a locking-tab design, ensuring immediate and tight assembly. Using a 12 5/8" inner diameter and a 15 5/8" outer diameter, it is rated for any solid fuel Isokern Fireplace. This versatile system has been tested and approved for use with Isokern Standard and Magnum fireplaces in typical or Fire-Lite applications. Available in air-cooled (EcoSteel) or insulated (EcoSteel+).

NEW
Square Termination
13ACECOSQ

Can be used with the EcoSteel air-cooled or insulated chimney systems.

EcoSteel vs. EcoSteel+ The Difference?

EcoSteel is an air-cooled chimney system with a stainless inner and galvanized outer.

EcoSteel+ is an insulated chimney system that is ideal for coastal areas, commercial applications, and venting that includes a mechanical chimney fan. It has stainless steel inner and outer construction.

Multi-Story Fireplace & Exhaust System (MFES)

Installing multiple fireplaces in a multi-story project can be cumbersome when each fireplace needs to have its own vented chimney or flue. The Multi-story Fireplace Exhaust System (MFES) has solved this issue with a design for multi-story concepts up to 25 units for gas fuels, and up to 12 units with gas or wood fuel, making multi-family housing projects more cost-efficient and reliable than ever. This innovative and unique experience in the building construction phase eliminates any guesswork in the field.

The tested and listed MFES is in partnership between Earthcore's Isokern brand fireplaces and Enervex, Inc. mechanical drafting appliances. MFES allows architects, designers and engineers to move multiple fireplaces venting into one common chimney. Due to the minimal vertical venting space, this advantageous design creates more living space while reducing utility area and long-term maintenance costs.

Together with Enervex, we don't build one-size-fits-all fireplace and venting solutions. Instead, we focus on understanding each owner's and developer's unique design needs. Our three-step process allows us to design a complete system that meets the specific requirements in each project:

1. Pre-sales analysis begins our cooperative effort in understanding the scope of project
2. System design is an integral part of understanding proper ventilation and exhaust system
3. Final engineering and installation toward the final phase and commissioning the system

Intellidraft Venting Solution

Maintaining proper and safe draft conditions for the fireplace while providing combustion air are massive challenges in today's tight construction. Now, you can set new standards in fireplace safety and energy savings for your gas fireplace or other gas-fired decorative appliances. Meet Intellidraft, ENERVEX's Modulating Fireplace Draft and Safety System.

IntelliDraft is an economical, environmentally friendly, intelligent draft solution that quietly maintains perfect draft for fireplaces while keeping homes from chimney downdraft and fireplace spillage. It is the first completely automated venting control system for use with gas fireplaces and is ideal for single family dwellings.

Mechanical Fan

The Enervex RS/RSHT Chimney Fans are mounted on top of the chimney, leaving little to no mess during installation.

The fan comes with speed control. You should mount the fan speed control in the room with the fireplace so you can adjust the speed (and draft) from there.

EM40

Mono Flue Chimney System

Our 16" Diameter EM 40 Universal Flue is the largest insulating masonry chimney available. With proprietary "Air-Vent" technology, it will not crack like cheaper concrete alternatives. Used exclusively for outdoor applications, it requires a 2" clearance to combustible materials.

Isokern Accessories

EM 40 Mono Flue Cap

Specifically designed for the Isokern 16" EM mono flue, this stainless cap is easily installed. This cap slides on top of the em-40 mono flue.

Cast Iron Damper

This cast iron damper is designed to sit in the throat of the Isokern fireplace and can be opened and closed with the poker control. Sizes available: 33", 42", 60", & 72".

Sealed Cast Iron Throat Damper

This improved product complies with Air Quality Management regulations supplied with an air-tight high temperature fiberglass gasket as opposed to loose-fitted glass doors. This damper utilizes a high temperature fiberglass gasket to prevent down drafts in a closed position. Sizes available: 33" & 42".

Bottom Mount Damper

The bottom mount damper is a proprietary design to be used when a conventional poker or top-mount damper is not feasible. Great with see-through applications, this type of damper can be paired with either the DM54 or steel chimney systems.

XB

HL

Cast Iron Grates

Our cast iron grates hold wood logs for proper ventilation, maximizing the burn of your solid fuels.

XB SIZES AVAILABLE: 24", 30", 36"
HL SIZES AVAILABLE: 23", 27"

Earthcore Adhesive

The earthcore adhesive is a proprietary thin set, which is used in all Isokern component installations. It also can be used for porcelain ceramic tile and fabricated or cast stone products. See installation manual for the required amount of adhesive for each fireplace. One 5 gallon pail per 10'-12' of DM54 masonry chimney.

Outside Air Kit

The outside air inlet allows fresh air into the firebox to improve drafting performance. (It does not guarantee perfect drafting in air-tight homes.) These kits come in stainless and black slide doors, 4" inch diameter UL tubing with stainless termination.

FIREBRICK

Make your fireplace a part of your home's decor with Isokern's Firebrick options. Typically made of fire clay or siliceous material, our Firebrick is a refractory brick, capable of sustaining intense heat without fusion. And since it's not prone to expansion or contraction, this material helps minimize cracking under extreme heating conditions. Coloration and size varies slightly.

ISOSET Firebrick Mortar

Isoset Brick Mortar, a thinset masonry adhesive, can be used in either interiors or exteriors for installing firebrick. It is the specified firebrick mortar to be used in all Isokern fireplaces. Isoset is available in 50lb buckets. Approximately 50lbs of prepared mortar will lay firebrick for fireplaces up to 48".

Firebrick Sizes

Fulls: 9" x 4-1/2" x 2-1/2"

GREEN TECH

Enjoy the warmth of a wood burning fire while contributing to a cleaner environment. The Green Tech Solution by Earthcore can be easily installed in a matter of minutes and reduce particulate emissions by up to 80%. While your fireplace is in use, the direct flame cleans the Green Tech Catalytic Combustor, resulting in a maintenance free solution for cleaner air in and outside of your home. This exclusive Earthcore catalytic combustor can be added to any Isokern Magnum or Standard Series fireplace.

- EPA Phase II qualified
- Reduces emission particulates by 80%
- Rated for both solid fuel and gas fireplaces
- Available for all Standard and Magnum Fireplaces

Green Tech Catalytic Combustor

The Green Tech series was designed exclusively for Isokern fireplaces and is also made to retrofit into any masonry fireplace. This easy-to-install design takes the environment into consideration while still enjoying your wood burning fireplace.

80%
Reduction
in carbon emissions
with Green Tech

FIRE-LITE

Have the wonderful ambiance of fire anywhere in your home with Isokern's Fire-Lite Application. Both the Isokern Magnum and Standard Series can be placed directly on a combustible floor or recessed into any combustible floor system. This is a UL tested and listed application. Details are available on our website.

OUTDOOR LIVING

Kitchens, Pizza Oven, Fireplaces & more

The possibilities are limitless when it comes to building your outdoor dream kitchen with our Isopanel. We streamlined the construction of building an outdoor kitchen for quick assembly using our panels and clip system.

ISOPANELS

Isokern Panels Components

Each panel weighs only 100 lbs, so they're easily moved when assembling your new outdoor kitchen components.

Clip Styles

Use: Slide the appropriate clip over the junction of 2 adjacent panels for holding them together while the mortar is applied.

Saffire Kamado Grill

Saffire Grills takes an innovative step forward for Kamados, with the patented Smokin' Chip Feeder Port and Crucible Firebox, plus extra thick, kiln-fired ceramics and heavy-duty hardware. The Saffire is the perfect addition to any Isokern outdoor kitchen design.

ISO'VEN

The user-friendly, remarkably affordable, outdoor wood burning pizza oven is made from our exclusive volcanic material. Created for easy installation, the Iso'ven Wood Burning Pizza Oven comes with everything you need to get started, including an accessory package of helpful cooking tools.

Includes

- 1. Utility Tong
- 2. (2) 12" Pizza Screens
- 3. 26" Pizza Peel
- 4. Coal Rake
- 5. Grill Glove

Optional Storage Base

The ideal companion for your Iso'ven Wood Burning Pizza Oven — our Optional Storage Base. It allows you to choose the height of your Iso'ven in relation to the rest of your outdoor kitchen or living space. Installed as-is, with no customization, our Iso'ven base is the perfect height to pair with one of our Isokern outdoor fireplaces.

Oven Hood

Following the classic approach of traditional wood burning ovens, the Iso'ven is designed to vent through the front. But at Earthcore, we believe customization creates satisfaction. So, if you prefer a flue, we now offer a hood for the Iso'ven, giving you the freedom to finish it in your own personal style.

Parts	A	B	C	D	E
Offset Block	21 1/2"	25"	11"	3"	6"

Small Crown Cap	26 1/4"	26 1/4"	1 1/4"	3"
-----------------	---------	---------	--------	----

Large Crown Cap	37 1/2"	37 1/2"	1 1/4"	3"
-----------------	---------	---------	--------	----

Please Note: The DM54 Chimney system is zero clearance to combustible materials. Offset Blocks offer the ability to move a vertical chimney from side to side, allowing it to pass objects above the firebox. Offset blocks require 1 1/2" clearance to combustible material. "Combustibles" are defined as "normal construction materials" and are considered to be: wood framing materials, particle board, mill board, plywood sub-flooring, plywood paneling and wood flooring.

SPECIFICATIONS

Firebrick Sizes & Dimensions

*** Please Note:**

4" firebrick must be used on the side walls of these units. For the Maximus 60 & 72 models, you will need 60 additional full or split firebricks. To achieve this for the Magnum+ models, you will need 70 additional full or split firebricks.
